Stay connected with Scrapboy.

We are looking to recruit a dynamic and talented senior database administrator to join the development team of our new Web 2.0 product. The major task is to design, develop and maintain the database of a high-availability database serving millions of users.

Required Skills and Experience:

- 7 years of IT experience with at least 5 years of database administration experience.
- 3 years of MySQL database administration experience with at least 1 year experience specifically with MySQL v5.0.
- 5 years experience and in-depth knowledge of Linux.
- Proficient in SQL Scripts and creating Stored Procedures.
- Experience with performance tuning, replication and high availability systems.
- Technically fluent in database programming languages, including SQL and PL/SQL.
- Meticulous eye for detail.
- Experience in a busy environment with the ability to cope with competing priorities.

Desired Skills and Experience

- Bachelors' degree in Computing Science, Software Engineering, Computer Engineering or related discipline.
- MySQL 5.0 CMDBA certification.
- Experience with DRBD and Linux-HA.
- Experience as a Linux system administrator.
- Experience working with Apache servers and with LAMP stacks.

Attributes:

- Strong interpersonal, communication, and organizational skills.
- Quick learning abilities with strong analytical and excellent troubleshooting skills.
- Must have good interpersonal skills, including: Teamwork, Respect, Courtesy, Tact and Discretion.
- Good sense of humour and desire to have fun at work.

Across the spectrum of social networking software Scrapboy Digital Media Corporation (www.scrapboy.com) stands above the rest, and so can you! We offer competitive salaries, generous stock options, comprehensive benefits, and an innovative, team-oriented environment.
